

AVIATION FUEL QUALITY CONTROL SPECIALIST

Professional Summary

A dynamic, results-oriented, and highly talented in Process Technology and Engineering with couple of years experience who has consistently received high ratings for technical and chemical expertise. Expertise in a wide range of manufacturing processes and manufacturing control systems. Demonstrated success in developing, implementing and managing new processes to improve quality and productivity. Skills include: process troubleshooting and maintenance of equipment/instrumentation. Experienced in quality control, statistical process controls, lean six-sigma, root cause analysis, sample chemical analysis, safety awareness as a fast paced learner and consistent team player. Well organized, innovative, and reliable who is able to work in any setting that requires a technical and a professional attitude. Proven ability in operating equipment, instrumentation, systems and operations in a safe manner.

Core Qualifications

Microsoft Office (Word, Excel, PowerPoint, Outlook)

Experience

June 2010 to Current

Company Name City , State Aviation Fuel Quality Control Specialist

- Regularly inspects equipments, valves, strainers, pipes, filters and hoses for any leakage or abnormality.
- Proven ability to leverage engineering skill-set by applying math, science, and engineering knowledge to provide a disciplined approach to problem solving.
- Known as a resourceful and innovative personality.
- Routinely performs icing inhibitor additive (prist) percentage concentration test using refractometer.
- Uses thermo hydrometer for API Gravity fuel test and correct temperature factor to 60F.
- Monitors differential pressure on filter vessels and nozzle pressure in PSI.
- Conducts color membrane and particulate test on downstream filtration.
- Executes line tracing and measures level underground fuel tanks.

June 2010 to August 2011

Company Name City , State Quality Implementation Assistant

- Collected strategic experimental data for analysis; used basic statistical tools and root cause analysis.
- Participated in the implementation of ISO9000 policies.
- Supported quality analysis on all new projects.
- Fully participated in external and internal audits as well as unscheduled inspections that assess safety of operations and safety processes, and followed through on recommended actions to improve performance.
- Initiated and reviewed environmental impact studies and sets appropriate procedures to meet guidelines.
- Prepared safety statistics for operations; evaluated against KPIs to ensure continuous improvements.
- Played a leading and instrumental role in the development of a detailed and complex Facility Security.
- Planned and was fully responsible for all subsequent awareness and refresher training for all directives.
- Conducted audits and identified health and safety hazards according to established policies and procedures.

July 2008 to September 2009

Company Name City , State Formulation Chemist

- Performed on Polyvinyl Alcohol functionalization and neutralization for the production of nelfilicon polymer.
- Demonstrated expertise while working either independently or as a comprehensive team player.
- Duties included analysis of aqueous polyvinyl alcohol for percentage of solids such as nitrogen, acetate content.
- Handled synthesized of batch processes of N-Acryloylaminoacetaldehyde-Dimethyl Acetal (NAAADA) by applying innovative methods of extraction, separation, distillation, salination, and purification.
- Assured that the chemical discharges were not higher than the regulated allowable limit in collected samples.
- Initiated the preparation of Irgacure used as photoinitiator for the production of nelfilicon polymer.

September 2006 to September 2007

Company Name City , State Quality Software Tester

- Increased profit by reducing defects to the lowest level by working with the vendor to the rework components.
- Initiated failure mode statistical data analysis and studied satellite signal behaviors at various transponders.
- Reviewed hardware and software to ensure they meet requirements prior to inputting into IT system.
- Provided attention to detail to detect errors early on in the process before errors became business issues.
- Management recognized for ability to understand and resolve issues related to hardware/software systems.

April 2003 to July 2006

Company Name City , State Inventory Associate

- Packaged tools and parts according customer specification.
- Duties included shipping/receiving of orders.
- Directed warehouse employees and drivers to ensure consistency in inventory receiving and restocking.
- Responsibilities included: inventory control, shipping/receiving, employee safety, and hazardous training.

April 1998 to January 2002

Company Name City , State Process Development Technician

- Managed prototype process for laser diode manufacturing, and studied sputtering uniformity deposition.
- Collaborated with engineers and managers regarding optical design parameters.
- Collected experimental data for analysis and interpreted yield results.
- Certified/trained on course of optical design for engineers.
- Provided troubleshooting of automated production equipment problems (conveyer belts, line equipment).
- Supported the development and implementation of solutions to improve line performance and reliability.
- Implemented process changes; maintained equipment for building fiber mount units.
- Installed software, conducted upgrades, trained operators, and identified ways to reduce production costs.

January 1994 to January 1998

Company Name City , State Research and Development Assistant

- Scaled up and modeled low pressure chemical vapor deposition processes.
- Conducted uniformity experiment on polysilicon film deposition.
- Worked out to identify transport phenomena and chemical reactions influencing these strategic processes.
- Called upon to determine parameters that fractional conversion depends on flow rate inside the reactor.
- Duties included final inspections and creation of quality documentation outlining inspection procedures.
- Maintained a professional attitude when handling laboratory work to ensure and verify expected results.

July 1994 to December 1997

Company Name City , State Analytical Chemist

- Conducted analysis of petroleum hydrocarbons, extraction of oil and grease, biological oxygen demand, and total organic carbon.
- Prepared standard and buffer stocks, blanks and spikes for determining of analysis.
- Managed and supervised the project sampling and analysis plan; converted data into a field executable sampling plan, securing laboratory services, ordering project supplies, and providing chains of custody; demonstrated ability in providing expert opinion and results interpretation of data quality and usability to the project teams or regulatory customers to meet company regulatory deliverables and milestones.

Education

8 2012

Lee College

City , State Process Technology

A.A.S GPA: GPA: 3.8 Process Technology GPA: 3.8

New Jersey Institute of Technology

City , State Chemical Engineering Bachelor of Science Chemical Engineering

Skills
