

CONSULTANT

Professional Profile

Consultant/System Engineer with 6 years in HealthCare IT. Primary focus has been on Linux with a recent emphasis on Regulatory Consulting and Transition of Care. Experienced in training and development of associates along with development of documentation.

Qualifications

- Working independently
- Training program implementation
- Quality control
- Process improvement
- System testing
- Gap analysis
- System administration
- UNIX system performance monitoring
- Technical writing
- Unix/Linux environments

Relevant Experience

Created build guides that ultimately led to the automation of many elements of the build process for several teams. This automation saved my team as well as others, weeks of build time and has allowed for a more standardized process.

Experience
