- Van Autreve Award Runner-up

Experience

February 2015 to Current

Company Name City , State Laborer Laborer duties consisted of forming and pouring concrete for sidewalks, floors, commercial parking lots and walls. Able to load and unload material, grading and digging while operating a skid loader. While working for Nehring I maintained a level of safety and completed projects on time. I have the ability to read and understand blue prints and implement any onsite changes that may be required.

March 2007 to April 2015

Company Name Engineer Main duties included management and motivation of 13 soldiers, development of discipline and giving direction. Project management responsibilities included signing and maintaining over 1 million dollars worth of tools and equipment, project/task follow through, and responsibility for project completion. Deployment responsibilities included safety of soldiers, project completion within specified deadlines and intense attention to detail. While deployed to Guantanamo Bay, Cuba I maintained and oversaw construction expansion projects for a multi million-dollar security facility. General duties also required self-motivation, working as a team to accomplish missions/goals, dedication to serve my country and community. Construction oriented duties required knowledge of construction tasks, preparation of projects and layouts and the ability to meet deadlines.

July 2006 to July 2006

Company Name City , State Duties included construction activities including framing, hanging sheetrock, building cabinets and roofing. Customized project work included trim work, decks, stairs and handrail, finishing basements and customizing kitchens.
